Hi there!

I am involved in a school project at the Public University in Navarra involving engaging students with the Olympic Biosphere Reserve. Our main goal is to create activities for students to learn about the reserve interactively and engagingly.

In the following week, I will send a follow-up email regarding some activities we have planned for students at the elementary school level. I hope you can pass this information on to the science department and provide feedback on the activities that we have created. I understand if you are far too busy to participate, but I thank you for allowing me to reach out.

Thank you,
Zoe Pitney
