Good morning,

We are a group of students in the second course of Primary Education at the Public University of Navarra (UPNA) located in the north of Spain. We are contacting you because we are carrying out a study in the subject of Natural Science about pollution in Poland. We have chosen your school, as it is an international school and we have been very interested in your objectives and active methodologies. We are working on a didactic proposal related to pollution in Poland, and it would be very helpful for us if you could have a look at it when we send it to you. In case you find it useful, we would be delighted if you could implement it in your classrooms.

We look forward to hearing from you as soon as possible.

Thank you very much.

Adriana Torrecillas, Ander Luna, Laura Rivas, Ainhoa Gomez and Maribel Rebolé.
